Objective

Motivated and detail-oriented **Backend Developer** with strong fundamentals in system design, API architecture, and database management. Passionate about building scalable systems and solving real-world problems through clean and efficient code. Seeking to contribute to dynamic engineering teams focused on high-impact projects.

Education

B.Tech in Computer Science and Engineering

2022 – 2026

Goel Institute of Technology and Management, Lucknow

Technical Skills

Languages: C++, Python, JavaScript, Java
Backend: Node.js, Express.js, REST APIs, JWT, WebSockets
Frontend: React.js, Next.js, Tailwind CSS
Database: MongoDB, MySQL, Firebase
Tools: Git, GitHub, Postman, VS Code, Render, Vercel

Training

Backend Development Intern — Substring Technologies

June 2025 – Aug 2025

Completed a 2-month industrial training focused on backend development and deployment.

- Built scalable REST APIs and authentication modules using Node.js and Express.js.
- Integrated MongoDB for data persistence and deployed apps on Render and AWS.
- Gained hands-on experience in production debugging, Git workflows, and server-side optimization.

Projects

AI Expense Tracker — MERN + OpenAI API

2025

Developed an intelligent expense management web app that provides AI-powered financial insights and natural language-based queries.

- Implemented secure JWT authentication, expense categorization, and interactive dashboards.
- Integrated OpenAI API for generating personalized spending analysis.
- Deployed full-stack application on Render with CI/CD and optimized REST endpoints.

DevConnect — MERN Stack

2024

Community platform with JWT-based authentication, protected routes, and user profiles using MongoDB and Express. Deployed via Render.

URL Shortener API — Node.js, MongoDB

2024

RESTful API for URL shortening with analytics tracking and expiration handling.

ChatApp — Socket.io, Node.js

2024

Real-time chat application supporting multi-room communication and live presence updates.

Experience

Backend Intern (Remote) — Open Source Project

Jan 2025 – Mar 2025

Contributed to the backend architecture for a community platform:

- Designed REST APIs, authentication middleware, and MongoDB schemas.

- Collaborated using GitHub for version control and agile task management.

Freelance Developer

2024 – Present

Delivered custom full-stack solutions for small businesses and clients.

- Developed dashboards, content management systems, and analytics tools using MERN.
- Focused on clean architecture, reusability, and optimized deployment pipelines.

Achievements

- Ranked in top 5% on LeetCode/Codeforces.
- Solved 200+ DSA problems and contributed to open-source tech communities.
- Built and deployed 10+ full-stack and backend projects using modern web stacks.
